

Eyebrow Service List

Brow Bar	Price	Duration
Eyebrow Trimming & Shaping	€ 10	10 mins
Eyebrow Tinting	€ 10	10 mins
Henna Eyebrow	€ 15	20 mins

A henna eyebrow lasts much longer than a regular eyebrow tint. The regular tint only colors the skin at the surface, which lasts a few days. However, the henna color can stay on the surface of the skin for between 3 to 5 weeks depending on the skin type.

Eyebrow Lamination	€ 45	45 mins
---------------------------	-------------	----------------

This involves straightening and lifting the hairs using a solution which allows the hair to have more flexibility to move to your desired shape therefore covering any gaps or stray hairs. After your natural brow hairs are straightened, a fixing solution is applied to keep the hairs straight, as well as a tint if desired. The result is fuller-looking brows that stay in place, lasting around six weeks.

Eyebrow Waxing	€ 7	10 mins
-----------------------	------------	----------------

Eyebrow Threading	€ 7	10 mins
--------------------------	------------	----------------

Eyebrow Microblading with Microshading	€ 250	120 mins
---	--------------	-----------------

Microblading is the semi-permanent secret to faking fuller eyebrows that look totally natural. This is a type of eyebrow architecture resulting in seemingly fuller eyebrows with an additional 3D dimension. A totally bespoke approach creating the best shape for each face. The procedure uses a very precise sloped blade with little needles at the end. The needles do not penetrate the skin but delicately scratch the surface to deliver very fine featherweight strokes creating fine, realistic, and natural hair strokes. Unlike tattooing, microblading is not in the deep layer of skin but more on the surface thereby delivering a semi-permanent result that could last up to 18 months. Within our procedure we combine microblading with microshading for a much softer finish. Whilst microblading is all about hair-like strokes to compliment your existing brows, microshading delivers tiny dots along your brows for a less defined finish. Our microblading artist will adapt using both procedures to create the most realistic and natural finish.

Eyebrow Microblading Touch Up	€ 100	60 mins
--------------------------------------	--------------	----------------

This touch up is to be done within a maximum of 6 weeks from the initial treatment. Following the initial treatment your skin needs to heal, here aftercare is crucial since this will significantly impact your microblading result. It is of the utmost importance that when your eyebrows start to scab or flake you refrain from itching the brows. Once brows are completely healed a touch up would be the next step. After the healing period you might notice uneven color and some patches. This is normal and addressed during a touch up, where the brows' sparse area and areas where pigment might have faded are filled in. This touch up service can only be delivered to our microblading clients. Other clients need to book a consultation for quote.

Eyebrow Microblading Consultation	Free	15 mins
--	-------------	----------------

MICROBLADING PRE CARE

- Do not work out 24 hours before procedure.
- NO alcohol or caffeine 48 hours before procedure (Yes, there is caffeine in decaf coffee and tea!).
- Avoid sun and tanning one week prior to procedure.
- Do not take Aspirin, Niacin, Vitamin E or Advil/Ibuprofen 48 hours before procedure.
- Avoid Fish Oil, Prenatal Vitamins, Nutritional Shakes, "Hair, Skin, Nail" supplements 48 hours prior to procedure.
- Discontinue Retin-A at least 4 weeks prior (and avoid on eyebrow area after procedure).
- Refrain from use of any Alpha Hydroxy Acid (AHA) products close to the eyebrow area 2 weeks prior (and avoid on eyebrow area after procedure).
- Botox and filler on the forehead, temple, and eye area should be avoided 1 month prior to procedure for those who do not regularly receive injectables.
- No brow waxing, tinting, or threading one week prior (the more natural hair growth you have, the better!
- Avoid Chemical Peels, Microdermabrasion or facials for 4-weeks prior procedure.

Please Note: You will be more sensitive during your menstrual cycle.

MICROBLADING POST-CARE

- Keep the brow area clean by using a natural fragrance-free gel cleanser and water. Hands must be freshly clean. Avoid use of abrasive washcloths or sponges.
- Allow eyebrows to completely air dry before applying ointment. Apply the aftercare ointment given (for the amount of days recommended by your artist) with freshly washed hands or a Q-Tip.
- DO NOT rub, pick, or scratch the treated area. Let any scabbing or dry skin naturally exfoliate off. Picking can cause scarring and pigment loss!
- COMPLETELY avoid direct sun exposure and tanning beds for a minimum of 4 weeks after your procedure
- Avoid pool, sauna, steam rooms, hot showers and/or hot baths for 3 weeks.
- Avoid sweating for a full 10 days. Any physical effort, gym, hot weather, any other activity that may cause sweating through or on the brows will expel pigment from the dermis producing poor results.
- Avoid sleeping on your face/brows for the first 10 days.
- Keep your bangs and hair pulled back from your face for the first 10 days.
- NO makeup or skincare products to be used on the treated area for two weeks.
- NO facials, chemical treatments, and microdermabrasion for 4 weeks.
- NO botox for 4 weeks. We recommend that it's best to wait until after your touch up heals to get Botox, as an educated injector will take your new brows into consideration when choosing where to inject.
- After 10 days, once the area has healed completely, use sunblock when going to stop the color from fading.
- Eyebrow tinting should not be undertaken for 2 weeks after your procedure.
- Avoid Retin-A, Chemical Peels and Microderms around the brow area once healed.

Please note: Eyebrows will appear darker and bolder due to natural healing for the first two weeks. This is very common for all permanent cosmetic procedures.

PERMANENT MAKEUP IS NOT RECOMMENDED FOR ANY CLIENTS WHO ARE OR HAVE:

Pregnant or Nursing, Diabetic, Viral infections and/or diseases, Epilepsy, A Pacemaker or major heart problems, Had an Organ transplant, Tendency towards keloids, Seborrheic dermatitis, Skin irritations or Psoriasis near the treated area (rashes, sunburn, acne, etc.), Sick (cold, flu, etc.), Used Accutane in the past year, Allergic to anesthetic (Lidocaine), extremely Oily or Problematic Skin

We strongly advise prospective new clients to book their Microblading appointments at least 3-4 months in advance of Vacations, Weddings, and Special Occasions. This allows adequate time for healing of both your Initial Microblading Appointment as well as a Touch-Up Enhancement Session 6-8 Weeks prior.
