

Amis Medical Aesthetics

	Price	Duration
Med-Aesthetic Consultation	FREE	15 mins

A consultation is required prior to every treatment. Our medical aesthetics doctor will advise on the ideal rejuvenating treatment for you. Most treatments can be performed on the day or booked for a future date if necessary. Consultation is free for a limited time period.

Botulinum toxin (Botox®/Bocouture®)

Botulinum toxin or Botox as it is most commonly known, works by relaxing the muscles which are responsible for causing certain expression lines, thereby improving their appearance and preventing worsening over time. Botulinum toxin is mostly injected in the upper part of the face that includes the forehead, glabella and crow line. Visible results are seen 3-7 days post treatment. Generally, this is a procedure with very little down-time and therefore the ideal lunch-time treatment.

Botox®/Bocouture® 1 Area (30 units)	€ 170	20 mins
Botox®/Bocouture® 2 to 3 Areas (50 units)	€ 230	20 mins

Dermal Fillers (Juvederm® Ultra 4)

As we age our skin loses collagen and hyaluronic acid as well as its underlying supportive structures, ie. fat and bone. With this loss of volume, the youthful facial contour is lost and common lines start to appear. Dermal filler injections were created to meet specific requirements of mobile facial areas. The use of fillers to the nasolabial folds and cheeks helps to diminish facial lines by restoring volume and fullness to the face. During the consultation the doctor will be able to recommend the best choice for you.

Juvederm® Ultra 4 (1 ml)	€ 300	20 mins
Juvederm® Ultra 4 (2 mls)	€ 500	20 mins

All Medical Aesthetic treatments at Amis are performed by a certified medical doctor. During the consultation the doctor will discuss benefits, alternatives and risks involved with each treatment as well as answer any of your questions and concerns and thereby recommend the best treatment for you.
