Long Hair	€	140	2 hrs 30 mins

Spa Steam Personalised Healthy Hair & Scalp Detox and Nourishing Treatment - This treatment is a spa experience for your scalp and hair using indulgent products featuring peppermint, citrus, vanilla and sage. The personalised products is applied in combination with steaming. When steam is applied to the hair and scalp, the moist heat opens the hair cuticle to allow benefits of treatments, oils, and masks to penetrate deeper into the hair fibre for maximum hydration and moisturization. The benefits of steaming go deeper to your scalp by softening the skin making the removal of built-up skin cells more effective. The benefits of hair & scalp steaming are;

- Enhanced product absorption, for more hydrated and deeply conditioned hair
- Improving hair elasticity, for less brittle hair therefor less breakages
- Unclogs pores which helps to increase the production of collagen and blood flow to the scalp thereby encouraging hair growth
